DIGILINK introduces the Die-Cast Aluminium High Density Premium Patch Panel

New Patch Panel saves rack space and gives you 24 port in a 1U panel

Mumbai, 09 September 2009: DIGILINK one of the leading brand in Structured Cabling Systems has introduced its High Density Premium Patch Panel. New Patch Panel redefines compact port management to help you meet the demands of the ever-growing data traffic. It has a unique die-cast aluminium design. The innovative design of this high density patch panel not only saves rack space and fits in a standard 19" rack or cabinet giving you 24 ports in a 1U panel but also provides excellent shielding to connectors. It delivers uninterrupted data at high speeds when installed in a "Total Availability Network".

The patch panel is available in unloaded kit form suitable for the entire range of DIGILINK UTP Keystones. The design of this high density premium patch panel makes installation fast and simple. The head to head jack assembly allows rear cable management with ease.

The extremely robust aluminium die-cast body provides very high strength to weight ratio. The die-cast aluminium construction is built to withstand the bulk and weight of terminated cables, in fact, one can literally stand over it without causing any damage to the patch panel. There have been two more innovations about sturdy cable manager and magnified Label holders. This Patch Panel is suitable for High Density 1U Solutions and is compatible with DIGILINK E400, DIGILINK G600, DIGILINK TG500 and DIGILINK TG800 UTP Keystones.

Feature Highlights:

- 24 Ports
- Occupies 1U height (44.5mm)
- Die Cast Aluminium construction
- Label holder magnifies port label for easy and fast identification.
- Die cast cable manager with unique design
- Easy cable routing with sturdy and wide cable manager

DIGILINK High Density Premium Patch Panel is available in market in a price range of Rs. 2400/- to Rs. 6100/-
